CONNECTED SUPPORT

*with
Cervus*

JDLINK. WHY CONNECT?

What if you could monitor your John Deere machinery while you're away from the field? What if a Cervus Equipment technician could diagnose a problem with your machine from the Cervus Equipment dealership? With JDLINK, these desires become a reality!

John Deere offers JDLINK to provide individuals with up-to-the-minute machine data and gives Cervus Equipment the ability to offer remote support before a trip out to farm is made, saving you time and money. Here is a look at some of the additional benefits JDLINK can bring to operators:

ONCE YOU'RE CONNECTED YOU WILL BE ABLE TO:

- Monitor machine hours, fuel level and machine health
- Monitor alerts from your machine remotely
- View and share machine location
- View the in-cab display from wherever you are through Remote Display Access (RDA)

ONCE YOU'RE CONNECTED WE WILL BE ABLE TO:

- Monitor alerts coming from your machine
- Diagnose problems remotely to to minimise downtime
- View the in-cab display to help you setup your machine
- In some cases, perform software updates from the dealership

COLLECTING DATA? WHERE DOES IT ALL GO? OPERATIONS CENTER.

To see, share, and use your data, you'll have access to the John Deere Operations Center and the connected mobile apps. The John Deere Operations Center is an online set of tools you can use to manage your farming operation.

AS DATA FLOWS INTO YOUR OPERATIONS CENTER ACCOUNT, YOU CAN:

- Backup historic data.
- See what's happening now and learn from your performance over time.
- Collaborate with others who support your operation, granting them easy, instant access to the data they need—so they can give you even better support and insights.
- Direct your business by creating action plans, prioritizing jobs, and communicating next steps to others.

The MyOperations app complements the John Deere Operations Center to allow you to easily leverage data from your connected machine while on the go – putting the Operations Center in your pocket.

HOW DO I CONNECT?

Contact your local Cervus Equipment Sales Representative. We have Precision Ag Technicians at all locations and our Precision Ag Specialist is always available for help and support.

OUR CUSTOMERS USING JDLINK AND OPERATIONS CENTER:

"JDLINK/Ops Center is integral to running our lasergrading business, it allows us to accurately bill out 'working' hours not including 'idle' time. We can remote access individual machines to get real time information."

T & S Lasergrading, Maffra

"Our Business is driven by technology and data. MyJohnDeere Operations Centre allows us to collect, review and make strategic business and agronomic decisions on the go all in the one programme which is very user friendly."

JOHN DEERE 3038E

"LANDSCAPING, PLOWING, EARTHMOVING,
HAULING... THE 3038E DOES IT WITH
EASE AND I COULD NOT BE HAPPIER!"

David Brooks, Ballarat

David Brooks owns 25 acres in the Ballarat area and recently purchased a new John Deere 3038E to help him maintain his property.

"I looked at a few different makes and models but the first thing that struck me was the comfort, room and ergonomics of the John Deere 3038E. After a little familiarisation session it became clear the stability, power and manoeuvrability was a whole new level compared to my previous tractor.

The 3038E is perfect for levelling out our future house site, as well as cleaning and tidying up our block. The 4 in 1 front end loader is responsive and easy to use via the joystick operation. Removing old stumps and trees has been a breeze.

I have hooked up our slasher, box scraper, harrows and carry all, which are easy to change regardless of what we are doing. We have achieved so much more with the tractor than its predecessor.

Landscaping, plowing, earth moving, hauling - the 3038E does it with ease and I could not be happier!"

3038E

- 38HP diesel engine
- Selectable 2WD & 4WD
- Hydrostatic transmission
- Twin touch foot controls
- Simple, intuitive colour coded controls
